

Android App: HourGlass

周子理 20162803 809643530@qq.com

Hold your time.

HourGlass is an app that can help you *Hold your time*.

It provide you with your time consuming on app and your device with different length period and different methods.

How to start

NOTE: This app is only for android phone with SDK version equal to or larger than 22, Android 5.1(Lollipop).

Just download and install the .apk file.

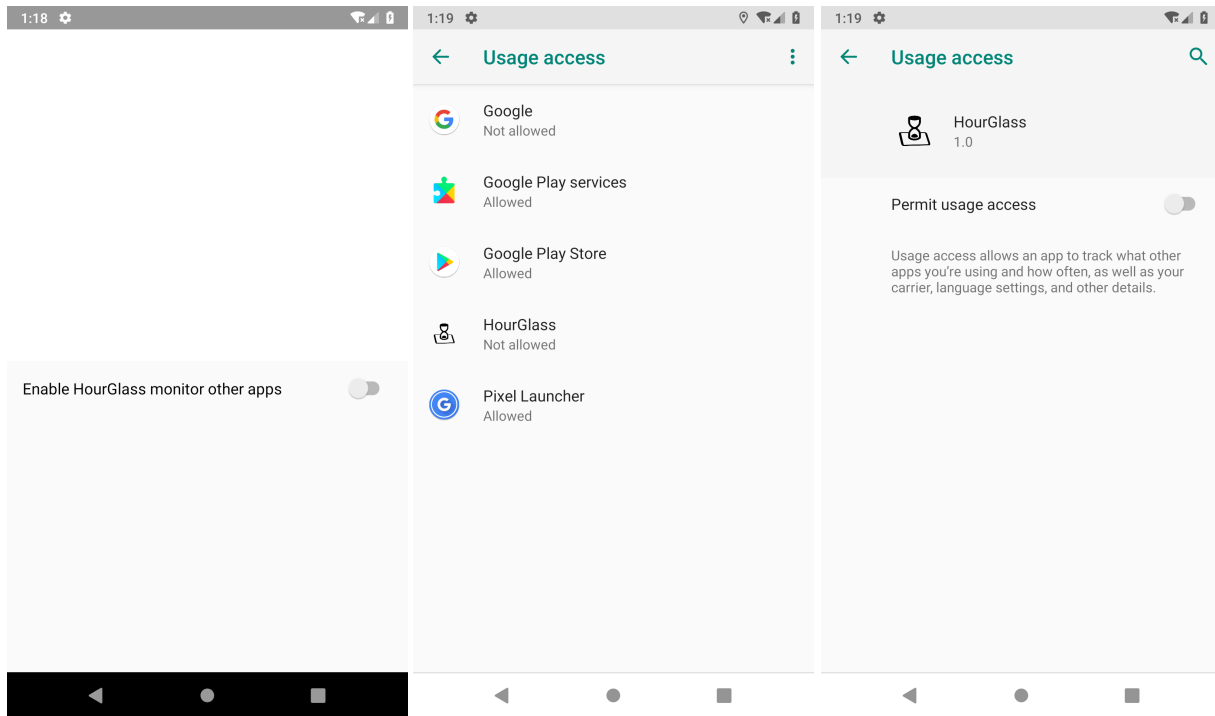

[HourGlass v1_0.apk](#)

And remember to allow the *Permission Request* when the phone is starting,

Then click the switch on screen and then find the app *HourGlass* on the list and enable it to monitor other app.

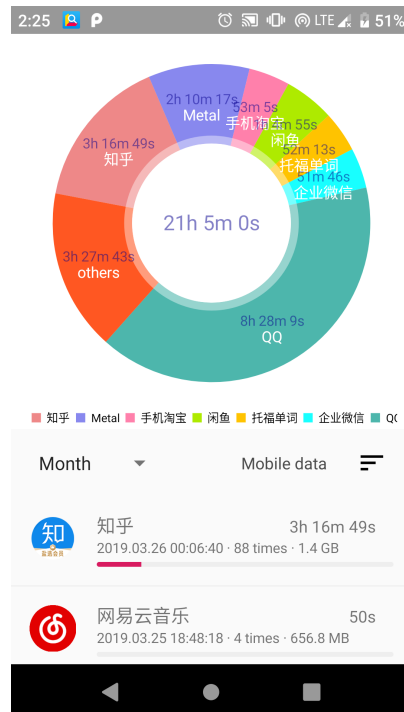

NOTE: This is a safe operation.

After you have done all these work, Congratulations, you can start using it read the apps' usage log on your device without waiting or collecting data.

Function Introduction

On the top, that's a pie-chart which shows the share of time spent on each app.

And under the chart there is a bar to choose period and sort method.

Period:{today, yesterday, week, month}

sort:{total, Date, frequency, mobile data}

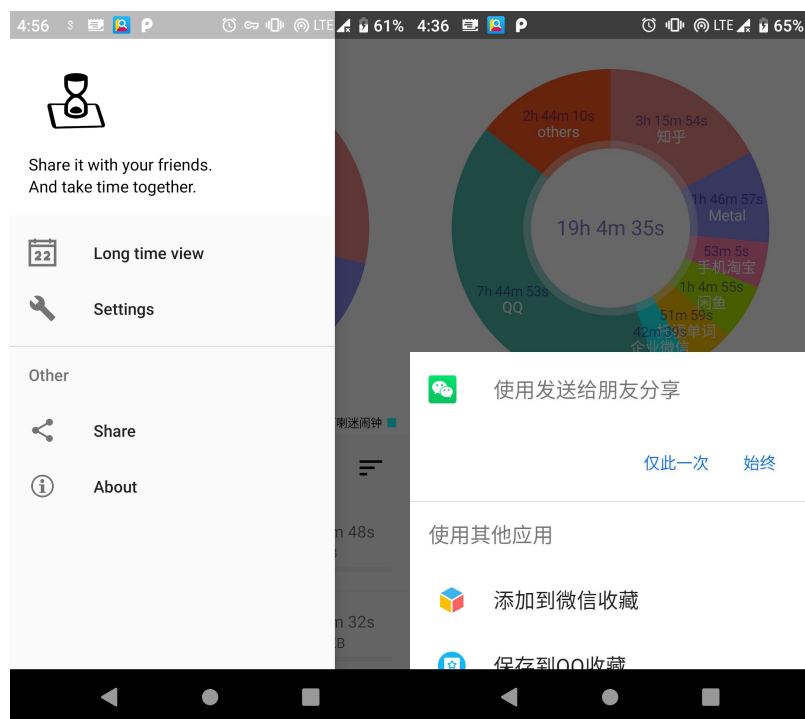

If you can't see the text on it clearly, rotating the chart may help you.

It also can **remind you to take a rest** if you use your phone for a long time.

Share

If you like it, just click the *Share* on the side bar and share it with your friend!

Hope you enjoy it!
